**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Overton.

Re claim 7, Overton discloses (Abstract; column 8, lines 28-64; Figures 5-7) an arrangement for improving text output in which a plurality of pixels having two states (on and off) are processed. An input array of pixels having a stray pixel (52) is identified and modified to match an output array of pixels (54) selected to produce a dot pattern corresponding to the input array having a stray pixel.

***Allowable Subject Matter***

3. Claims 1-6 & 11-12 are allowed.

4. Claims 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2624

5. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 1, 8, & 11 (and dependent claims 2-6, 8-10, & 12), the art of record does not teach or suggest the recited change of one pixel from a first state to a second state and change of another pixel from the second state to the first state in conjunction with the recited identification and modification of stray pixels in a set of two-state pixels.
